

What is drama?

1) the spoken word, monologues, plays, screenplays utilizes inventive rhythm & rhyme, strong scenes, clear conflicts, energetic dialogue and most importantly, a strong story usually told with images.

2) drama does not take a lot of time or invested thought. The audience is being told a story vs blindly feeling it out. The experience is completely different than a secluded and repeated reading session.

3) dramas take away the option to interpret a piece of literature. The audience has less thinking to do and are allowed to be less focused, so while drama is sensational and vivid, it is always pre-thought out before the audience even starts to interact with the work.
